All Things In Time

Toad the Wet Sprocket

Call me up when you need
Strangers often deceive
And there's something so freeing
To call out a name, someone's believingI've been changing my mind
Through with looking behind
It's a crash course in life
Best you can do is getting by
Getting out aliveI'll hold a light for you to see
All things in time
All you'll ever needSomething I can't explain
Keeps me running, afraid
Every day looks me in the face and says
"Who'd you think you were, anyway?"If you'll hold a light for me to see
All things in time, all we'll ever need
Well, you told me so we've done this all before
So rigid, it keeps us coming back for moreI'll hold the light for you to see, yeah
All things in time, all you'll ever need
All things in time, all we'll ever need, ever need
