Everything

Chris Cagle

What is it about you that drives me crazy
What is it about you that drives me wild?
What is it that gets my heart a racing?
Well I've been thinking about it and I've finally put my finger on it
It's everything you do like what you do when you're with me
It's everything you say and how you say it baby
Your kiss, your touch, the way that you love
Guess what I'm trying to say, it's everything
What is it about you that makes me giddy?
What is it about you that makes me weak?
What is it that makes me feel so damn silly?
Make a list, well girl I've tried it but there ain't no way to quantify it
It's everything you do like what you do when you're with me
It's everything you say and how you say it baby
Your body, your mind, the child that's inside
Guess what I'm trying to say, it's everything
It's everything you do like what you do when you're with me
It's everything you say and how you say it baby
Your body, your mind, the child that's inside
Guess what I'm trying to say, it's everything
What is it about you?
What is it about you girl?
What is it about you?
Girl it's everything
