

Marabous

Eggstone

winters do
all appear to be blue
why don't we
pull the monkey from the tree
cause in my book
you're underlined a million times and so i
want to show you
where the marabous ascend
i could easily do without you
till i find that you're not there
surely see the world without you
only wishing you could share
early sun
on your neck and i must run
afternoons
passing by i'll see you soon
every day
that we don't meet is incomplete and so i'm
saving up
to take you to the marabous
aeroplane
above the clouds it never rains
gasoline
coast to coast a lot to see
marabous looking nice
and i am mad about you
look again
when the marabous ascend
i could easily do without you
till i find that you're not there
surely see the world without you
only wishing you could share
