

All Night Dance Parties in the Underground Palace

Alesana

Beautiful, you know you leave me breathless
When you fall into my eyes
My heart belongs to you my angel There is just no reason for you to
Let life bring you down
Please come with me and let me show you I know that at times it may be hard to let go of yourself
Baby girl, tonight leave your cares behind
Because it's time to celebrate All night long I'll sing and dance with you
My sweet princess only if you trust in this
Take my hand and follow me
I will sweep you off of your feet
All night long I will sing and dance with you Every time I look at you I can't believe
How magical you are
The stars belong to you my angel Run away with me into a world
Where time seems to not exist
The smile on my face will show you I know that at times it may be hard to let go of yourself
Baby girl, tonight leave your cares behind
Because it's time to celebrate All night long I'll sing and dance with you
My sweet princess only if you trust in this
Take my hand and follow me
I will sweep you off of your feet
This night will only end when we stop dancing My sweet princess I will sing and dance with you
All night long
The stars they belong to you my angel All night long I'll sing and dance with you
My sweet princess only if you trust in this
Take my hand and follow me
I will sweep you off of your feet
This night will only end when we stop
