A Flame For Freedom

Dragonforce

One dream in all of us still shining
One star the everlasting light
So alone so lost inside to the end in paradise
United victorious the hearts of our nation tonight
In the dark December morning light
Fall strong to the burning winds, the fires of hell will forsake me
Shattering the chains that ever bind us
Suffering their pain eternally
Four strong smash the silence carry on like before
Fires burn still we battle lost so far away
Storm with hellfire raging, sun shines down as they kneel
Lost in times and long forgotten gathering miles away
Tears fall inside the dream our last days gone by
Still alive we feel the pain tonight
Stars fall through blackened clouds in dreams sadness reigns
A twilight star in the thousand lights for me, ohh
One dream in all of us still shining

One star the everlasting light
So alone so lost inside to the end in paradise
United victorious the hearts of our nation tonight
And still we save a breath for the world
Life brings up for us all
United victorious the hearts of our nation tonight
One dream in all of us still shining
One star the everlasting light
One dream in all of us still shining
One star the everlasting light
So alone so lost inside to the end in paradise
United victorious the hearts of our nation tonight
And still we save a breath for the world
Life brings up for us all
United victorious the hearts of our nation tonight
United victorious the hearts of our nation tonight
