

Swimming Ground

Meat Puppets

The sun is up and beating down
Hot enough to melt the ground
A little water would do us goodThe clouds would help us if they could
They'd send showers of pouring rain
Get everything wet againWe could go and float around
In our favorite swimming ground
The best place I ever foundWasn't close to any town
Was a little swimming ground
Everything just floating aroundOut to lunch and out of town
Pretty close to falling down
A little water would do us good
