

London, After the Rain

High Highs

We were with her when silence came from overhead
Considering a message right from where to live You
You wanna run back to know what you are
And the words too quiet
Straight from your arms
Running to the sun, and then you hide as you come Now you you wanna bring that holy fees
From off the earth to safety now
Rain down
Rain in the moon
Rain is over us Rain down
Over the earth
When you cover us
Rain down
Rain in the full moon
Until it's clear
Until it's clear We were with them in silence all tonight
Careful in the minutes to come to take your life
The way you run back to know what you are
