

# The Catalyst

## dissimulator

I am on your side  
You light me up inside  
You fill my eyes with stars  
It doesn't get me very far  
Just look around  
You don't need no fairy tale to get you by  
Just look around  
You don't need no Santa Claus  
You don't need to make things up  
But if there's something more than this  
I'll meet you sucked inside a kiss  
And if there's something more to this  
Then I will be the catalyst  
I wish I could say something beautiful to  
Make you fall in love again  
But love has slowly faded away like  
Spotlights shining in to space  
I am on your side  
You light me up inside  
You fill my eyes with stars  
It doesn't get us very far  
Just look around  
You don't need no fairy tale to get you by  
Just look around  
You don't need no Santa Claus  
You don't need to make things up  
But if there's something more than this  
I'll meet you sucked inside a kiss  
And if there's something more to this  
Then I will be the catalyst  
I wish I could say something beautiful to  
Make you fall in love again  
But love has slowly faded away like  
Spotlights shining in, spotlights shining in to space  
Just look around  
You don't need no government to get you by  
Just look around  
You don't need no Santa Claus  
You don't need to make things up

But if there's something more than this  
I'll meet you sucked inside a kiss  
And if there's something more to this  
Then I will be the catalyst  
I wish I could say something beautiful to  
Make you fall in love again  
But love has slowly faded away like  
Spotlights shining in, spotlights shining in to space
