

We Don't Make Love Anymore

[Kenny Rogers](#)

The love that we have is not so bad
Unless you think about the love that we had
I don't know, who closed the door
But we don't make love anymore We used to love, you used to care
Now it's hard to find the feeling we shared
You found a way to even the score
And we don't make love anymore So come lie down beside me and talk to me
Touch me with your body and your mind
Help me find the feeling and push all this behind
We'll make sweet, sweet love one more time But you won't try and I'll understand
We'll just live our lives the best we can
We turn out the lights, we still lock the door
But we don't make love anymore
