High Places

Los Lobos

The advantage of being in high places
Is that you never have to look up
The advantage of being in high places
Is that you never have to look upAnd you feel like a big shot
It makes you feel like a big shot
It makes you feel like a big shot
Makes you feel like a real big shotThe advantage of being in high places
Is that people look so small
The advantage of being in high places
Is that people look so smallAnd you feel like a big shot
It makes you feel like a big shot
It makes you feel like a big shot
Makes you feel like a real big shotThe trouble with being in high places
When you fall it's a long way down
The trouble with being in high places
When you fall it's a long way downThe trouble with being in high places
The trouble with being in high places
The trouble with being in high placesThe trouble with being in high places
When you're down nobody picks you up
The trouble with being in high places
When you're down nobody picks you up'Cause you acted like a big shot
What happened to the big shot
So what happened to the big shot
You thunk you were a real big shotThe trouble with being in high places
The trouble with being in high places
The trouble with being in high places
The trouble with being in high places
