

Burning

Alien Ant Farm

You got static in your ears
And redness in your eyes
If you need some meds
I'll be your doctor
Make it right tonight. Time for a transformation
You've been feeling low
Maybe an operation
Girl come to my hospital. I know that I can heal you
Just look into the light
And every time I feel you
It's getting hotter and hotter
You're burning up inside
You're burning up inside. You got chills and hear strange voices
Ringing in your head
You might be crazy or deranged
At least that's what the doctor said. Time for an intervention
Here's your second chance
And if you slip and fall
You know I'll drive the ambulance. I know that I can heal you
Just look into the light
And every time I feel you
It's getting hotter and hotter
You're burning up inside
You're burning up inside. Your symptoms aren't as radical
But fever's left you numb
Forget the pills you; ve been prescribed
The prozac and the lithium. I'm your resuscitation
And your remedy
Only a call away
I'm good for all emergencies. I know that I can heal you
Just look into the light
And every time I feel you
It's getting hotter and hotter
You're burning up inside
You're burning up inside (X2)
