Before the Dawn

Colin James

Come here darlin and lay down by my side
The big stars fallin and the moon will turn the tide
The whistle of the wind will lead us on
Here we are, not too far
Before the dawnPictures keep on fallin from the walls
The ghosts are still careenin through the halls
The drunken neighbour sings his favourite song
In the stardust of the night
Before the dawnYou never really know just who your friends are
Till you find out at last who they are not
You never recognize the things you really want
Till you remember all the dreams that you forgotWeve been runnin for so long against the grain
Tryin to find a way to turn around again
Trouble in your heart will soon be gone
Its lonely blue, its only true
Before the dawn
