

# Leuchtturm

## Untergangskommando

It's time to take you with me  
On all the seven seas  
We'll sail until the end of time  
The moon will keep us company It's time to make the flight now  
The skies are clear for take off  
This longing has been calling your name  
All I want is just to play this game For you I'd do those crazy things  
And I'd lay the world down at your feet  
I'd catch the falling stars from heaven  
All these only to kiss you just one time It's time to take you with me  
Down all the endless highways  
We'll run until the end of time  
The moon will keep us company
