

We'll Sleep When We're Dead

Blessthefall

Let the light shine in
Cause we're not alone
We're not alone
Let the light shine in
Cause we're not alone
We're not alone

(We will tear away, we will tear away)
This awful feeling, Lets start the bleeding
(We will wash away, we will wash away)
(All of your doubts)
This will be the last time that..
You're never going to hurt again
I'll never sing this song without you (without you)
Remember the way that it felt
You're never going to hurt again
I'll never sing this song
Remember the day
Remember

Hide your makeshift hearts
We're taking aim (we're taking aim)
And we won't be leaving
(Hide your) makeshift hearts
We're taking aim, taking aim
We won't be leaving

(We will tear away, we will tear away)
This awful feeling; lets start the bleeding
(We will wash away, we will wash away)
(All of your doubts)
This will be the last time that..
You're never going to hurt again
I'll never sing this song without you (without you)
Remember the way that it felt
You're never going to hurt again
I'll never sing this song
Remember the day.

Remember

Let your, light shine in tonight, tonight, tonight.

All alone is where we've been before.

All alone is where we started.

All alone is where we've been before.

All alone is where we started.

(All alone is where we've been before)

(All alone is where we started)

(All alone is where we've been before)

(All alone is where we started)

We'll be testing the martyrs,

We'll be testing the martyrs.

And bringing hell and high waters,

And bringing hell and high waters.

We'll be testing the martyrs,

We'll be testing the martyrs.

(And bringing hell and high waters)

And bringing hell and high waters
