

# Glow

## Tundra

Have you ever tried  
Inventing a colour in your mind  
It's always just what you see with eyes  
The spectrum won't ever compromise  
Won't compromise

We've tried taking it slow  
But soon the moment will go  
I can no longer sit here and watch you glow

I know a girl  
She came from some other perfect world  
I don't need to invent her in my mind  
I guess she was just a lucky find

We've tried taking it slow  
But soon the moment will go  
I can no longer sit here and watch you glow
