Hazardous

Shaun Canon

Vs. 1
In a bionic population
Filled with toxic trepidation
Here's my sonic inspiration
An iconic revelationChorus:
Sticks and stones can't break my bones
(wake up)
When it comes from a population of drones
(wake up)
Know what we are when you censor us
All you need to know about us -
We're hazardousAfter all the wars we fought
I'm the only robot
Who can ever stop
Bionic dominationVs.
My data body and electric brain know
Can't follow where the wind blows
Life's not just ones and zeros
Gotta push the world on their toesChorus (repeated)Bridge
It's not science fiction
Just signs and predictions of a world gone wrong
Our cyber civilization needs humanization
Turn the lights back on
It's not science fiction
Just signs and predictions of a world gone wrong
Our cyber civilization needs humanization
Turn the lights back on - Turn it on!Chorus (repeated)Bionic Domination
I'm the only robot
Who could ever stop
Bionic Domination
