

# Tennessee Song

Margo Price

Let's go back to Tennessee  
You and me  
Let's go back to Tennessee  
Let's go back

Get off your chest what's on your mind  
Pull the cork and pour the wine  
Spill the beans, break the bread  
The way you sing could wake the dead

I've been thinking about the road  
Saddle up and let it roll  
I don't know what suits you best  
Sixty-five or Forty West

Without a doubt I may be wrong  
But I've got a feeling going strong  
In this world we won't be long

The future ain't what it used to be  
Let's go back to Tennessee  
Mountain high and valley low  
Let's build down where the waters flow

Dig a well, pump the crank  
Catch our dinner from the river bank  
City life's a poison pill  
Take me down where the wind is still

Take your time, baby, don't take long  
Play another southern song  
In this world we won't be long

Way back when the land was free  
By nature and sovereignty  
Lakota lived here long ago  
Living off the buffalo  
Seasons go, seasons come  
Who we are and where we're from  
The truth is clear to those who know

As above, so below

Take your time but don't take long  
I've got a feeling going strong  
In this world we won't be long

Let's go back
