

# Victims of Mathematics

## Grade

I'm one fourth of what I used to be  
And half of what I need  
We're the victims of mathematics Oh, applying fractions to modern day living  
Is as useful as handling gasoline  
Handling gasoline to an arsonist It's a twisted science  
I can't add up the ones and zeros  
The ones and zeros Does arithmetic count?  
It just totals our mistakes  
And subtracts our gains  
And still the volume isn't any louder I need more rock in the monitor  
So get your hands on the console  
This mechanism is creating victims  
I need more rock in the monitor I need more rock in the monitor  
I need more rock in the monitor  
I need more rock
