Saboteurs

Sabaton

Advisory - the following lyrics contain explicit language:

Dropped onto a world of ice
A plateau of frozen lakes
A Nazi place of doom
In their sightsTrained in camps on Scottish heights
To commando saboteurs
The mission of their lives
Lies aheadCalled in to serve and they knew what to do
They were the heroes of the cold
Warrior soul, they sign the book of history
They played a leading role to win the second warAllied time was running short
They would race against the bomb
And as hours turn to days
Time pass slowAs the nature test their strength
They would fight through night and day
To live amongst the wild
Stay aliveCalled in to serve and they knew what to do
They were the heroes of the cold
Warrior soul, they sign the book of history
They played a leading role to win the second warHeroes of the telemark carry Viking blood in veins
Warriors of the northern land, they live forever more
Heroes of the telemark carry Viking blood in veins
Warriors of the northern land, they live forever moreCalled in to serve and they knew what to do
They were the heroes of the cold
Warrior soulWarrior soul, they sign the book of history
They played a leading role to win the second war
Warrior soul, they sign the book of history
They played a leading role to win the second war
