Bridges

Bent Fabric

I'll be the bridge you can use to whenever you need to
I'll be the bridge you can use to whenever you need to
Get over problems in your way and I will pick you up
Over mountains high together we'll walk over the bridge
There's a place where you can go lay your head down comfortable
And its always there for sure don't you know, no
And it comes as no surprise, mountains that you must climb
Sit back don't run away have no shame
There's no wrong, there's no wrong, there's no right, no right
Its only you and how you treat your life
See baby, if the road you choose don't work out for you
You know, you know, I'll be your rescue, sugar, sugar
I'll be the bridge you can use to whenever you need to
Get over problems in your way and baby, I will pick you up
Over mountains high together we'll walk over the bridge
Like a diamond shinin' bright you see you're young and flyin' high
Big dreams of having things in your eyes you thought it all makin' cash
But that's no mean, never last how'd you throw it all away
Hear me say
"Let me take you far away, be sure to find your destiny
And you know without a doubt that I would be your bridge out"
I'll be the, and I will
I'll be the bridge you can use to whenever you need to
Get over problems in your way and I will pick you up
Over mountains high together we'll walk over the bridge
I'll be the bridge you can use to whenever you need to
Get over problems in your way and I will pick you up
Over mountains high together we'll walk over the bridge
