

Pink and Black

Tyler Hilton

So, yeah, you said
You heard this one
Maybe lived it twice
With bias on my side I swear I've got
A different one
To be laid to line
And with a dime for your advice You never saw a man
Make a fist
And grab so fast
He said Good luck you know
You better just forget it
'Cause love is never
In the same place that you left it I said you
Wouldn't understand
This was long term love
She was perfectly described And what she wore
When we last met
It was pink and black
A study in scarlet up inside You never saw a man
With bigger eyes
That understand
He said Good luck you know
You better just forget it
'Cause love is never
In the same place that you left it You never saw a man
With bigger eyes
That understand
He said Good luck you know
You better go and get it
'Cause love is never
In the same place if you left it He said good luck you know
You better go and get her
'Cause love is never
In the same place if you left her
