

# Everywhere Is All Around

## Ash

The dust the world has gained is washed away by rain  
Some stains cannot be moved mistakes you cannot lose  
But the circle never ends it all comes round again  
Round and round and round and round Everywhere is all around find it if you can  
Make the most of what you've found  
Keep it with your plans Kid twist took the fall from the half moons sixth floor  
We know what we are and what you thought you saw  
The half moons secret lies in Buggy Siegal's eyes  
It's what we bring to those who sing Everywhere is all around find it if you can  
Make the most of what you've found  
Keep it with your plans  
Everywhere is all around find it if you can  
Make the most of what you've found  
Keep it with your plans
