Contradictions

Prong

Time for double standards
Now, who shall be blamed
With the change of weather
Scapegoats are acclaimedActs of no reason
Populous response
Opinions are like assholes
Everyone's oneAll these contradictions
Are bound to confuse
All these contradictions
What wrong will you choose?Can I ask a question?
Or am I out of line?
Some more lip service
Will smooth it out niceAll these contradictions
Are bound to confuse
All these contradictions
What wrong will you choose?All these contradictions
Are bound to confuse
All these contradictions
What wrong will you choose?You choose, you choose
You choose, you choose
What wrong will you choose?All these contradictions
Are bound to confuse
All these contradictions
What wrong will you choose?All these contradictions
Are bound to confuse
All these contradictions
