

# Follow

## Semisonic

I would sure love believing  
In something that's never leaving  
Would like to let go the hurting  
When everything's so uncertain You know, I've tried  
To show you what I have inside  
Will we laugh at how this all began  
When you're an old woman and I'm an old man? Take me wherever you go  
Help me forget tomorrow  
Love me your best and I know  
All of the rest will follow  
Love me as well as you know  
And everything else will follow I wouldn't mind pretending  
It's something that's never ending  
Would like to believe that someday  
We won't be living this way I know, you tried  
To show me you were on my side  
Could it be that I've already found  
The thing that I've been searching the whole world 'round Take me wherever you go  
Help me forget tomorrow  
Love me your best and I know  
All of the rest will follow  
Love me your best and I know  
Everything else will follow (Take me wherever you go)  
Everything else will follow  
(Help me forget tomorrow)  
All of the rest will follow  
Love me as well as you know
