

Goin' to California

Gin Blossoms

I know where you are
Always on a shooting star
But I know that I could find
A special place of mine
And I'll never want to go And I'll beg borrow and steal
To get to where you are
This time's for real
And I'm going to California
And I swear I've got to warn Ya
That I may never leave again
Leave California....Wonder what's in store
Is it time for us to fall apart
And I know that I will find
Something else of mine
and I know this one will fall apart And I'll beg borrow and steal
to get to where you are
this one's for real
And I'm going to California
And I swear I've got to warn Ya
That I may never leave again
Leave California....Solo And I'll beg borrow or steal
To get to where you are
This one's for real
And I'm going to California
And I swear I've got to warn Ya
that I may never leave again
Leave California....I may never leave again
Leave California....I may never leave again
Leave California....Leave California....Leave California....
