Started With a Spark

Tough Lovers

I don't see anybody else, and i don't care that much about myself
with a drink in her hand she's staring back at him
with a wink in her eye she says lets begin
and go out of the daylight and into the night time

out of the light and into the dark, it ends with a fight yet it started with a spark
hell we tried to go out of the daylight and into the night time
