

You've Got What It Takes

Bernard Butler

Rollin' motor, lover sublime
Push me away if you feel so inclined
You've got what it takes I'll be brother, I'll be guide
I'll take you home when you wanna hide
You've got what it takes You've got what it takes You've got what it takes Clickin' machinery, clickin' tongues
Ever wondered, "What have I done?"
You've got what it takes but nobody knows You confide in me at the end of your days
How you wish you'd written a book or a play?
You had what it takes, you had what it takes You've got what it takes Don't you feel so helpless?
Don't you feel so low?
An' when you catch me cryin'
You'll probably be the first
So don't let nobody else know You've got what it takes You've got what it takes You've got what it takes
