

# Secret God

[Neil Finn](#)

Lets go climb up on the roof  
In the twilight 360 degree views  
As we lie down  
Watch the fading light turn into stars  
There you are Secret God, breathe my name  
Secret God, stir up the dust  
Whisper my name This reminds me of another place  
Lonesome Wolf comes down from the hills  
It is walking in circles howling at the moon  
In another life, he will be enchanted by a woman Secret God, stir up the dust  
Breathe my name  
Secret God, stir up the dust  
Whisper my name  
In my mind See a man collapse  
In the doorway of a restaurant  
Holding my hand out  
The first one there to help him up Secret God, stir up the dust  
Whisper my name  
Secret God, stir up the dust  
Breathe my name Time on hand, stir up the dust  
Breathe my name  
Secret God, whisper my name  
In my mind
