My Love

Kylie Odetta

Kept is the dream that I dream
White snow and trees evergreen
I'll be your queen, you'll call me majesty
Soft petals fall from the sky
They keep coming like the tears in my eyes
but you'll be my king, beyond the gates you'll see

Dark midnight, you've gone away
Candlelight, shadowed face
Frozen, your veins stopped
My heart plummeted down
You could hear the

Drop all you have my love
Take me away and we'll live forever
Hold on to me don't go
I want you to stay, it's selfish I know
Drop all you have my love
Take me away, remember forever
I'll still be here my love
In the stars and in the constellations

Kept is the touch of your hands
but your destiny is angels
Your face was made of the moon and the sun
A white knight, a charmer, your beauty
Is not from the world that I see
You belong in the heavens baby
I understand that now

Spare one more night with me

Drop all you have my love
Take me away and we'll live forever
Hold on to me don't go
I want you to stay, it's selfish I know
Drop all you have my love
Take me away, remember forever
I'll still be here my love

In the stars and in the constellations

Dark midnight, you've gone away
I'm fragile but I'm okay
And I feel you, believe me
This love, your light, will never leave

Drop all you have my love
Take me away and we'll live forever
Hold on to me don't go
I want you to stay, it's selfish I know
Drop all you have my love
Take me away, remember forever
I'll still be here my love
In the stars and in the constellations
