

# Candle In the Wind (Ben's Song)

[Andrew Jackson Jihad](#)

I wish I had more money than I have  
And I know that that's not punk  
But I'd like to pay my rent  
And I can't survive without money  
I can't survive without money

And I want to eat rare red meat  
I want to feel it digesting  
Inside of my tummy  
I support animal testing  
I'd kill a kitten  
To save a human being

The human race  
They are big big dicks  
We fuck holes in the world  
And fuck everybody else  
And we fuck, because we are lonely  
We fuck, because we are lonely

And we oughtta give it  
One more shot  
We have to save the world  
And bathe ourselves with love  
Because love is all we need  
Except love, isn't all we need

We need compassion  
And we need empathy  
And we need love, a little bit  
And we need some money  
Or a way to fulfill our 5 basic needs  
That we all have  
We all have

---
