

# You Make Me Sick

## Egypt Central

I used to think this was perfect, and wish that it was never ending  
But those days are gone forever. It's something I'm not missing  
There's a force there's a voice, in my head  
Telling me to think about the times that you were cruel and mean  
I don't care if you walk away I'm here to stay and you need to hear

(Chorus)x2

You make me sick, but I love what we're doing here  
You make me sick, and I can't be the only one

I have to take advantage before the moment passes by  
It's so hard to manage the ups and downs of your life  
Someone help someone speak before I start to scream out, anything to break the silence You're holding me back  
confined by doubt

(Chorus)x2

Cause I need you, cause I need you here with me  
When it falls through and I'm down upon my knees  
There's a force there's a voice in my head telling me to  
Think about everything last time I believed now I realize

(Chorus)x2

sick sick sick sick sick sick sick  
you make me sick sick sick sick sick  
you make me sick sick sick sick sick sick sick  
you make me sick sick sick sick sick
