The Space Between

Cleopold

Does it hurt to remember
The way it all went oh so wrong at night
I had three words to tell you

If I close my eyes
Will that start a fight?

You got me so deep
In my head
I can't let go

Fly into places
Far Away
So high and low

And it's hard to understand
Why you're slippin' through my hands

Smokin' mirrors all around
And all words keep coming out

You got me dancing in the space between
At day and night I want you next to me
You got me dancing in the space between
Damn, I, I want you next to me

I'm out of touch
Losing focus

When I see your eyes
on someone else

Don't you think that I won't notice
If I can't have you for myself (?)

You got me so deep
In my head
I can't let go

Fly into places

Far Away
So high and low

And it's hard to understand
Why you're slippin' through my hands

Smokin' mirrors all around
And all words keep coming out

You got me dancing in the space between
At day and night I want you next to me
You got me dancing in the space between
Damn, I, I want you next to me

You got me dancing on the space between
And at night I want you next to me
You got me dancing on the space between
Damn, I, I want you next to me
