

# I Won't Forget You

## Kill Your Idols

Tomorrow's always gonna come a new day rises with the sun I hope that it brings better things how you're going now is no way to live I can't break free from these feelings these thoughts that send me reeling I thought I was so strong until you went and proved me wrong forever seemed to come yesterday and where did yesterday go feelings once shared now are gone only memories to live on Chorus:I won't forget you 4x
