

# Zoo

## Greg Gibbs

I can no longer watch TV  
Cause that shit really melts my brain  
I think Im what they call sensitive  
And easily thrown off my game All that bloodshed and pettiness  
Just makes the world seem so insane  
And I just feel drained When I go to do my food shopping  
And all I can see is the packaging  
One big mountain of garbage  
About to be happening And I walk past my own self-loathing  
Like I walk past animals in the zoo  
Trying not to really see them  
And the prison they didnt choose If I should ever quit your spotlight  
I hope you wont think me wrong  
Says the poet to the moonlight  
Says the singer to the song Its enough just to stay upright  
Upright in every single way  
Pour your love into your children  
Until theres nothing left to say Pour your love into your children  
Until theres nothing left to say
