I Can't Say

The Trews

f you break that's all you can do My mistake was I thought more of you If you find yourself beside me looking for some faith I can't say that our world is safe When I'm on my way to another lonely placeLasting heartache is now in view A cold dark shade that once was you If you find yourself beside me looking for some faith I can't say that our world is safe When I'm on my way to another lonely place I can't say that our world is safe When I'm on my way I'm sad to leave this Pale eyes on a sullen face Frail ties and time misplaced time misplacedSo if you break that's all you can do My mistake was I thought I knew you but Colours bleed through, Colours bleed through And you who I thought that I knew Colours bleed through I can't say that our world is safe When I'm on my way to another lonely place I can't say that our world is safe When I'm on my way with the will to leave this place yeah yeah yeah yeah Colours bleed through Colours bleed through
