

Your Signs

Nonpoint

Gotta make the list of what is best
gotta make the fist and beat against
have to leave an impression
do you have a suggestion?
i'm all out of good ideas
the ones you have always put into your ears
with all you care to share
how did i end up here? your signs are pointing to nowhere
that's exactly where i won't go
your signs are pointing to nowhere
and no one that i know
will ask all you care to show me
care to show me gotta make the list of what is best
gotta make the fist and beat against
have to make this perfectly clear
i'm not waiting for one million years
for us in general
you make the chemical
situation i put us in
unfamiliar in foreign land your signs are pointing to nowhere
that's exactly where i won't go
your signs are pointed to nowhere
and no one that i know
will ask all you care to show me how would you like me
where would you like me to be
and could you make me worry
just a little more
the way you look at me confuses me
even with you next to me your signs are pointed to nowhere
that's exactly where i won't go
your signs are pointing to nowhere
and no one that i know
will ask all that you care to show me
your signs
your signs (care to show me)
your signs
care to show me
care to show me
i won't go
