

# Chart of the Elements (Lincchostbllis)

## Tourniquet

Give me an l - lithium, give me an n - nitrogen, give me a c - carbon, give me a ch - chlorine, Give me an h -  
hydrogen, give me an o - oxygen, s-t-b-l-l-i-sChart of the elementsThe chart, hung on the wall of the school -  
learn every element, the golden rule  
Written in stone, we were told it was true - to question it would make you look like a foolA shocking discovery  
was recently made, some facts were messed up on the chart we obeyed  
An error was found in the weights of these ten, so tear down the chart - let's start over againGod lives, God is  
truth, God breathes, God is truth  
God loves, God is truth, God lives, God is truthLattice energy, orbital properties, allotropes, isotopes, vaporized  
particles  
Lattice energy, orbital properties, allotropes, isotopes, covalent radiusChart of the elements
