Guess

Jim Drew

By surprise the fragile fluids that were
Seem to disappear behind the eye in disguise
Or how it ought to really ought to be
Like crystal breaking in a spoon and it's too late
A finger bends another glass of fruitBy surprise I finally see the problems in their eyes
Or how it ought to be really ought to be
Behind my eyes a different set of keys A figure A to B
Are you mean or do you mean goodbye?Are you clear, do you mean goodbye?
Then they say to you
Say it here, say it hereA different time you stayed too soon
Or played before I even know
Say it here, say it hereA candle shows the lack of what I need to see to be confused
But not to use a better friend than
You're his he finds he stayed too soon or played before I even knew
I guess it's just of business now, I guessAre you clear, do you mean goodbye?
When I say
Say it here, say it hereDifferent time you stayed too soon
Or played before I even knew
Are you clear? Say it here
