

# Sick of It All

## Finger Eleven

Are the sins getting staler  
Does every moment move past you  
Or does it feel like forever  
And shouldn't you be laughing too?

Take a look how they found you  
Take a look what they've done to you now  
What was it they wanted  
Sullen and haunted?  
If only you saw it coming

[Chorus:]

How far down would you fall  
If you never came up again?  
'Cause you're so sick of it all  
And you want to change everything  
Just how deep would you go  
To see through it all?

If you could consume her  
Would you say you were finding your way out?  
Is anything coming clearer  
Smashing your mirror?  
Still you can see you're guilty

[Chorus]

Coming closer my composure  
Turning inside out in her  
Calling home all alone  
You can call I won't answer  
Any question in my head  
Remains until you feel the same  
Never telling how I felt is all I ever cared about

How far down would you fall  
If you never came up again?  
'Cause you're so sick of it all  
And you want to change everything  
Someone somewhere should know

If you wanna come back around  
Just how deep would you go  
To see through it all?  
To see through it all  
To see through it all  
It all...  
It all...
