

# The Big Bang Theory (Theme Song)

## Barenaked Ladies

Our whole universe was in a hot, dense state  
Then nearly fourteen billion years ago expansion started, wait  
The earth began to cool, the autotrophs began to drool  
Neanderthals developed tools  
We built a wall (we built the pyramids)  
Math, science, history, unraveling the mysteries  
That all started with the big bang! Hey! Since the dawn of man is really not that long  
As every galaxy was formed in less time than it takes to sing this song  
A fraction of a second and the elements were made  
The bipeds stood up straight, the dinosaurs all met their fate  
They tried to leap but they were late  
And they all died (they froze their asses off)  
The oceans and Pangea, see ya wouldn't wanna be ya  
Set in motion by the same big bang!  
It all started with the big bang! It's expanding ever outward but one day  
It will cause the stars to go the other way  
Collapsing ever inward, we won't be here, it won't be hurt  
Our best and brightest figure that it'll make an even bigger bang! Australopithecus would really have been sick  
of us  
Debating how we're here, they're catching deer (we're catching viruses)  
Religion or astronomy (Descartes or Deuteronomy)  
It all started with the big bang!
