

# Friend

## Golden Smog

Took me down when I was there  
You shot me down like you didn't care  
You're only, the only simple wish  
You're only wish was born a prayer  
For a friend You toss and turn in your bed alone  
You throw abuse through a telephone  
Why don't you just sit back relax  
Sit back and let your feelings go  
With a friend Can't you let it go  
Oh, it aches you so  
Got to let it go, let it go, let it go, let it go On New Years Eve, you had it all  
A new year came and I watched you fall  
You're only plan was for a man  
You're only plan was for a friend  
Just a friend Can't you let it go  
Oh, it aches you so  
Got to let it go, let it go, let it go, let it go I can't believe the things you can't see  
You're never wrong, you're always right  
You're never wrong, you're always right  
You got me wrong I can't believe the things you can't see  
You're never wrong, you're always right  
You're never wrong, you're always right  
You're never wrong, you're always right  
You got me wrong You're never wrong, you're always right  
You're never wrong, you're always right  
You got me You toss and turn in your bed alone  
You throw abuse through a telephone  
Why don't you just sit back relax  
Sit back and let your feelings go  
With a friend, with a friend, with a friend  
Friend, friend, friend, friend
