Beyond the Surface

Kutless

I've been hiding, hiding for so long
Right behind my digital mask
I've been trying to be someone I'm notAll these perfectly fake people
Push us to insane ideals
They're nothing more than counterfeit imagesThat push me away
To bleed out the pain
Don't you dare to make another movePut the knife away
That's not what anybody needs
There's a better way
Than everything now that you seeStop comparing who you are
To who you want to be
Let's step out beyond the surfaceDon't give in to everything
The world around tells you to be
Open up your mind, release your selfStop the lying, stop comparing
Who you are to what you see
Never letting fear hold back the changeAnd push you away
To bleed out the pain
Don't you dare to make another movePut the knife away
That's not what anybody needs
There's a better way
Than everything now that you seeStop comparing who you are
To who you want to be
And step out beyond the surfacePut the knife away
That's not what anybody needs
There's a better way
Than everything now that you seeStop comparing who you are
To who you want to be
And step out beyond the surface
