

# It's My Life

## The Global Hitmakers

Looking out the airplane window  
Thirty thousand miles of shadow  
All the silver linings bend into the night  
Never any hesitation, never any explanation  
I wish I had a ticket of this flight  
Everything keeps moving fast  
What I want is what I have  
Right now, I'm closer than I thought I could be  
It's my life, my time to find the answers  
Don't always know, what kind of road is in front of me  
But I'll go slow, wanna remember every moment  
That passes by the goodness ride has ever been  
It's my life  
In times I really miss my family  
I wonder what they're doing right now  
I know they're thinking of me  
I can't imagine where I'm going  
But I know where it is I come from  
And it makes me feel complete  
Everything keeps moving fast  
  
What I want is what I have  
Right now, I'm closer than I thought I could be  
It's my life, my time to find the answers  
Don't always know what kind of road is in front of me  
But I'll go slow, wanna remember every moment  
That passes by the goodness ride has ever been  
It's my life, it's my life  
And it's a real good fight trying to find what's mine  
Tryin' to be who I'm supposed to be  
It's my life, it's my time to find the answers  
Don't always know what kind of road is in front of me  
But I'll go slow, wanna remember every moment  
That passes by the goodness ride has ever been  
It's my life, my time to find the answers  
Don't always know what kind of road is in front of me  
But I'll go slow, wanna remember every moment  
That passes by the goodness ride has ever been  
It's my life
