

Dry

Orange 9mm

Dry All our pain and all our love has all been given
All our pain and all our love has all been given
We were like one to show ourselves that we could be stronger than the gun
That shot us both right between the eyes
It shattered our prize, the blood made us cry
Have you ever tried to cry?
Have you ever tried to cry?
We danced like a fire, burned off a bridge
Nothing else matters when you're floating on the sky then you stopped dropped me from your smile
I fell, without you I could not fly
The blood made us cry
Have you ever tried to cry?
Have you ever tried to cry?
We don't know how our caress turned to hell
I melted my heart when I tried to do it again and again
How can we run?
We once loved so much
I guess it's not so hard to say goodbye, but still the blood makes us cry
Have you ever tried to cry?
Have you ever tried to cry?
