

Last Call

[Daniel Skye](#)

Yeah If I ever said it to you lately is 'cause I lost all the words to say
And I get it if you think I'm shady, but I can't keep on running away. The words on my lips, so can we forget, I
wish we could let it go
It pulls me apart, to see where we are, but we can't fix this up if you're down. Hey, I know that I made a mess, I
know that it's just an excuse
But when it's last call at the end of the night, I call you
But when it's our song as it turn off the lights, I hear you
When it's late, I forget that we wasted forever too soon
When it's last call at the end of the night, I call you.
If we never pick up bottle pieces, it will matter who is right or wrong
If I ever gave you any reasons as if we hold up for too long. Hey, I know that I made a mess, I know that it's just
an excuse
But when it's last call at the end of the night, I call you
But when it's our song as it turn off the lights, I hear you
When it's late, I forget that we wasted forever too soon
But when it's last call at the end of the night, I call you. 'Cause I'm here, in the flame and I'm stuck on you
and it's here, on my face and I'm stuck on you
But when it's last call at the end of the night, I call you
But when it's last song as it turn off the lights, I hear you
When it's late, I forget that we wasted forever too soon
But when it's last call at the end of the night, I call you. I call you.
