

Take Me There

McFly

I don't ever want to spend another day
Without you, without you
I don't think that I'd be standing here
If I never found you, never found you
Right now the sun is in your eyes
The moment has arrived to see
Right now there ain't no better time
I feel like you're alive in me
Can you take me? Can you take me?
Can you take me there?
Can you take me? Can you take me?
Can you take me there?
I get anxious just to know that you're the one
I come home to, come home to
Being without you makes me suffocate
'Cause baby, I breathe you, I breathe you
Right now the sun is in your eyes
The moment has arrived to see
Right now there ain't no better time
I feel like you're alive in me
Can you take me? Can you take me?
Can you take me there?
Can you take me? Can you take me?
Can you take me there?
Right now the sun is in your eyes
The moment has arrived to see
Right now there ain't no better time
I feel like you're alive in me
I feel like something is special here
I feel like something is special
I feel like something is special here
I feel like something is special with you
I don't ever want to spend another day
Without you, without you
