

Situations

New Found Glory

I wanna feel the sand beneath my feet
Breathe the breath of your fresh air
Fill the silence of this room
Lay in bed when you're not there Be the source of best advice
You're in dying need of it
'Cause I love you too much to let you go now Obviously you were too distracted
Filling your days with romantics
It's in your blood to draw attention
Make the best out of situations Kiss me, I want you to hold me
It's in your blood to draw attention
Make the best out of the situation I wanna see the sunset over me
Catch up with an old friend
See a girl I used to like
Do cartwheels up and down my heart Telling secrets underwater
Giving Valentine flowers
I'll wait by this mailbox for you or your letter Obviously you were too distracted
Filling your days with romantics
It's in your blood to draw attention
Make the best out of situations Kiss me, I want you to hold me
It's in your blood to draw attention
Make the best out of the situations Obviously you were too distracted
Filling your days with romantics
It's in your blood to draw attention
Make the best out of situations Kiss me, I want you to hold me
It's in your blood to draw attention
Make the best out of the situation 'Cause obviously you were too distracted
Filling your days with romantics
It's in your blood to draw attention
Make the best out of situations
