

All we Want, Baby, is Everything

Handsome Furs

Heaven was a place we built out of stone
Just like a fever, dream, causing mold
I know it pains me to treat you unkind
The cloud is greater, oh, love is blind
All we want, baby, is everything
All we want, baby, is everything
Heaven was a song we etched in gold
Just like a fever, dream, in the rose, oh
All we want, baby, is everything
All we want, baby, is everything
You know we hate your friends
Up where the train bends
Though we hate your friends
The dead emotion
And blood is cold
We'll vacuum the heart should be
And blood is cold
Like the ocean
Put away, put away, put away in the atmosphere
Put away, put away, put away in the atmosphere
