

Let's Get Lost On A Country Road

Kit Kats

Little girl that I see, drive a country road with me,
Place your self, by my side, have a country world inside
Just think all the sights well see, if you will go with me, there'll just be you and me tonight.
Oh, so beautiful the night will be, a country road & you and me,
The moon wont have to shine and then your eyes will be our light
There'll be no rush; well take it slow, no matter where the road may go,
Well just drive on, and meet the rise of dawn

Oh, so beautiful the night will be, a country road with you and me
The stars wont shine tonight; your eyes will be our light
There'll be no rush; well take it slow, no matter where the road will go,
Well drive on, until the break of dawn.

Little girl that I see, drive a country road with me,
Place you down by my side, have our private world inside,
Just think of the sights well see, if you will go with me,
There'll just be you and me tonight.
