

Three Ring Circus

Beady Eye

Didn't walk, could've run
Ain't that enough?
Feel alive, out on a limb
Same way as up I wanna be
Where we as people should be
I wanna see
What's that sound Could've won, should've lost
And lay down and sung
Change your mind, change your line
Under my tongue I wanna go
Where we as people should go
And I wanna know
What goes on In this three ring circus going round
This three ring circus going round
In this three ring circus going round
This three ring circus going round I wanna be
Where we as people should be
I wanna see what's that sound
Make it home In this three ring circus going round
This three ring circus going round
In this three ring circus going round
This three ring circus going round
